

# BIOTERRAIN: A UNIFIED FIELD

THE CAUSE OF ALL DISEASE II

# Dis-ease: Mutation vs Transmutation

## Diagnosis thru Observation

"Symptoms are literal, predictable & obvious for those adept at pattern recognition."

### THE CAUSE OF ALL DISEASE

I. DEFICIENCY: The Biochemic analysis reveals the exact correspondence between symptoms & the Cell Salt(s) deficit causing disruptions in the cellular maintenance of proper form & function.

II. THE BIOME: Injury, toxicosis & other tissue changes trigger the mutation of indigenous organisms thru 16 stages to perform restorative & cleansing functions. Isopathic therapy guided by Live Cell Microscopy & symptomatology down/up-regulates these life cycles to fulfill their purpose, while bolstering long-term health.

III. THE 6 STAGES OF DIS-EASE: Cumulative toxicosis initiates a progressive deterioration then labeled as *dis-ease* according to the location & quality. The recognition of this predictable process will pinpoint both the cause & remedial measures to be taken.

IV. LINE OF RESISTANCE: Biological Ionization Analysis identifies impediments to the proper transmission of current thru the ground tissue matrix due to conductance-resistance imbalances. This results in energy loss with disruption to the electrical quadrant most affected.

V. E-MOTION: The lower Astral Body retains informational entrainments from past embodiments, collective Miasm & acquired stress patterns necessitating a Biological Expression comprising the majority of all dis-ease conditions.

Active processes within any of the 5 categories of Dis-ease Etiology will eventuate in the disruption of the Hydrogen-Oxygen Axis, a reduction in cellular ATP production & the accelerated decline of Bioterrain integrity.

# Alchemy as Authentic Science

## Intelligent Design vs Indeterminism

### The Cult of Materialistic Determinism

#### ALCHEMY: The observation of Cyclic Patterning

- Cause: Directed Consciousness = Electricity
- Continuity: Holographic repetition thru the Etheric medium
- Mechanism: Transmutation ie. Form transience
- Purpose: Self-Determination

#### SCIENTISM: Conjectured Rationales

- Cause: Random accidentalism
- Continuity: Theoretical constructs
- Mechanism: Materialism thru isolated processes
- Purpose: Social Engineering

Celestial Fire/Hydrogen descends through the Ethers first via Air/Nitrogen then picks up Moisture from Oxygen/Water/Moon to incubate in the Earth/Carbon.  
Emerald Tablets, Golden Chain of Homer

# Metamorphosis: The Mechanics of Creation

## The Holographic Terrain

### From Elements to Principles

	<u>ELEMENT</u>	<u>ETHER</u>	<u>FUNCTION</u>	<u>PRINCIPLES</u>
	FIRE	HYDROGEN	ELECTRICITY	
	AIR	NITROGEN	COAGULATION	SULFUR
	WATER	OXYGEN	FERMENTATION	MERCURY
	EARTH	CARBON	PRECIPITATION	SALT

“As Nature is extremely subtle and penetrating in her manifestations, she cannot be used without the Art. Indeed, she does not produce anything that is perfect in itself, but man must make it perfect, and this perfecting is called alchemy.” ~ Paracelsus

# Metamorphosis: Creative Mechanics

## The Holographic Terrain

### The Etheric Planes to Physiology

	<u>ETHERIC</u>	<u>PROCESS</u>	<u>MATTER</u>	<u>ANATOMICAL</u>	<u>FUNCTION</u>
	MENTAL	IMAGINING			
			SOUL	TORSO	METABOLISM
	ASTRAL	E-MOTION			
			SPIRIT	EXTREMITIES	MOVEMENT
	VITAL	IMPRINT			
			BODY	CRANIUM	NEUROLOGY
	PHYSICAL	FORM			

“One has to understand that the medicine must be prepared in the stars, and that the stars become the medicine.” ~ Paracelsus

# Metamorphosis: The Science of Life

## The Holographic Bioterrain

6

### Histology, Ecobionts & the Elements

Signs & symptoms alert with great specificity the needs of the Bioterrain.

	<u>GERM LAYER</u>	<u>ECOBIONT</u>	<u>ELEMENTS</u>
△	ENDODERM	FUNGI/MYCOB	NAT/FE
△	MESODERM	BACT/MYCOB	CALC/MG
▽	ECTODERM	CELL DEBRIS	KALI/MG

*"Simply put, Nature is motion through transmutation, and Alchemy is the demonstration of these principles."*

# Medical Alchemy

“Seeing the whole in each part”

7

## The Alchemical Process

▶ SEPARATE: Isolation of the 3X3:

- 3 States of Matter – Spirit, Soul & Body – Spiritual, Individualization & Physical Vitality
- 3 Generative Qualities – Wet, Hot & Dry – Living Cells, Ecobionts & Elements
- 3 Principles – Mercury, Soul & Salt – Musculo-skeletal, Vital Organs & Nervous System

▶ PURIFY: Biotoxin, Emotional & Karmic release for the unimpeded flow of energy.

▶ COHABATION: Realignment with Universal patterns for renewal & expansion.

“The transmutation of Body (Salt), Soul (Sulfur) & Spirit (Mercury) are predicated upon a working knowledge of Universal Principles combined with Spagyric technologies.”

# The 4 Phases of Transmutation

## Individualization

The Kingdom of Man is a composite of the Ray qualities inherent in the Mineral, Plant & Animal Kingdoms, but uniquely imbued with the 3 Principle Rays for the possibility of Individualization.

RAY I – WILL/POWER (MERCURY)

RAY II – LOVE/WISDOM (SULFUR)

RAY III – ACTIVE INTELLIGENCE (BODY)

	<u>PHASE</u>	<u>COLOR</u>	<u>QUALITY</u>	<u>RAY</u>	<u>ATTRIBUTE</u>
	NIGREDO	BLACK	DISSOLUTION	IV	HARMONY THRU CONFLICT
	ALBEDO	WHITE	MOON	V	KNOWLEDGE
	CITRINITAS	YELLOW	SOLAR	VI	DEVOTION
	RUBEDO	RED	COMPLETION	VII	TRANSMUTATION

Alchemical change is often categorized in 4 Phases & corresponding colors representing the allegorical & literal journey of the Soul through the maya of matter.

# Form & Function

## Geometry thru Resonance

9

12 CELL SALTS: Deficiencies are foundational to all symptoms attributed to “disease”. Cells only utilize the constituents from which they are made. Deficiency symptoms alert for early-onset correction.

Cell Salts provide the informational fields required for the distribution & regulation of organic matter, fluids & oxygen for cellular renewal, biotoxin removal & a balanced pH.

1) EXAMPLE 1: Malarial Fever – attributed to mosquito-borne pathogen.

- ▶ Nat Sulf = Excess Moisture, Ferum Phos = O2 Deficient Blood
- ▶ Pulse rate increase = O2 to tissues, Heat & Muscle Convulsions to eliminate abnormal moisture retention.
- ▶ Quinine contains both Nat Sulf & Ferrum Phos.

2) EXAMPLE 2: Pneumonia = lung inflammation/infiltration of exudate.

- ▶ Kali Sulf = Skin pores close & waste matter turns inward.
- ▶ Increased Pulse to eliminate waste & compensate for deficient Ferrum Phos/O2.
- ▶ Waste accumulates in lungs, microbial recyclers etc.

3) EXAMPLE 3: Brain Embolus, Myocardial Infarct etc.

- ▶ Kali Mur = fibrin producton & distribution altered, with accumulation of organic matter forming clots etc.

### Calcium Salts

Calc Flour: Elastic Matrix  
Calc Phos: Hard Matrix  
Calc Sulph: Matrix Cleanse

### Potassium Salts

Kali Mur: Fibrin regulation  
Kali Phos: Brain/Nerve  
Kali Sulph: Cellular Respiration

### Sodium Salts

Nat Mur: Water Transport  
Nat Phos: Acid Regulation  
Nat Sulph: Water Reduction

### Fe/Mg/Silicea Salts

Ferrum Phos: Oxygen Transport  
Mag Phos: Muscles/Motor Nerves  
Silicea: Cellular Integrity/Cleanse

# The Biome

10

- I German biologist Günther Enderlein discovered protein colloids that comprise the pre-stages of Bacteria. He considered these primitive protein groups, or what he termed “chondritins”, as the beginning of life on the evolutionary ladder.
- II A symbiotic fusion of these smallest living forms in living cells cycle through 16 mutational stages from to fulfill numerous physiologic functions. “Endobionts” develop into autonomic micro-organisms extruded from cells as a result of cellular destruction.

## THE MICROBIAL MILIEU:

- ▶ Pleomorphism: Life-Cycle phases in response to BioTerrain requirements.
- ▶ Species Specificity: Circulatory Blood/Lymph, Organ Systems etc.

## EMBRYOLOGY: Paired Species & Cyclogeny to 3 Germ Cell Categories & Corresponding Brain Control Centers.

- ▶ Brainstem/Endoderm - Fungi/Mycobacteria: Repair, Recycle & Regulation.
- ▶ Cerebellum/Cerebral Medulla/Mesoderm - Bacteria/Mycobacteria: Repair, Recycle & Regulation.
- ▶ Cerebral Cortex/Ectoderm - Cell Debris Mediated (Virus): Stimulates Surfactant Production & Humoral Regulation of Exosomes, Stem Cells, Antibodies etc.

## THE ECOBIONTS OF THE HUMAN ECOSYSTEM

Microorganism Species innate to human ecology possess affinities to distinct tissues & conditions. These include:

- *Aspergillus niger* – lymphatics & respiratory system.
- *Mucor racemosus* – Cardiovascular-microcirculation.
- *Penicillium notatum* – regulation of bacterial phase issues.
- *Penicillium frequentans* – regulation of cell debris mediated.
- *Penicillium roquefort* – intestinal tract regulation & repair.
- *Candida parapsilosis* – gut(oral thru descending colon) & Urinary tract regulation & repair.

# The Six Stages of Disease

11

*"Diseases are the expression of biologically purposeful defense mechanisms against endogenous and exogenous homotoxins or the expression of the organism's effort to compensate for toxic damage it has sustained." ~ German medical doctor & homoeopath Hans-Heinrich Reckeweg*

THE SIX STAGES: Phases of adaptation that correlate with body strategies to excrete, sequester & neutralize toxins through physiological mechanisms.

## HUMORAL PHASES:

- ▶ Excretion: In this phase, the body is able to cope adequately with the toxins through excretion.
- ▶ Inflammation: Natural attempt of the body to neutralise toxins that it cannot adequately removed by excretion.

## MATRIX PHASES:

- ▶ Deposition: The body sequestors toxins that overwhelm normal drainage channels into into select tissues & organs.
- ▶ Impregnation: Prolonged deposition leads to contaminants being "pigmented" to become part of the connective tissue itself.

## CELLULAR PHASES

- ▶ Degeneration: Cellular damage ensues due to the prolonged & cumulative toxicosis.
- ▶ Differentiation: Cellular differentiation & DNA changes produce distinct & aberrant cell forms.

# Line of Resistance Electro-Biomechanics

12

Agronomist, biochemist and mathematician, Dr. Carey A. Reams developed a working explanation about the fundamental ionic energy composition and function of biological life.

## THE LINE OF RESISTANCE

- ▶ The validity of any laboratory assay is determined by its capacity to discern the role of each biochemical element within a functional composite.
- ▶ Biological Ionization Analysis employs a mathematical equation to quantify values of key elements within a proportionate whole, and the degree of deviation from ideal ratios necessary for optimal physiology.
- ▶ BIA successfully decodes the quality of electric current within the biological matrix from biochemical conduits to reveal the intricate cause and effect of physiological dysfunction.
- ▶ Six tests: total carbohydrate, pH, conductivity, cell debris, nitrate nitrogen & ammonia nitrogen from urine & saliva.
- ▶ The LOR reveals net energy gain or loss in real-time by its ability to decipher the quality of currency flow through biochemistry. Ideal numbers represent a net energy gain, while any energy loss accelerates the inevitability of aging and dis-ease.

$$\text{Line of Resistance: } CS + 1.5 \frac{6.4}{6.4} 6-7C .04M \frac{3}{3} = PH \rightarrow \text{Ideal Regenerative Harmonics}$$

Hahnemann identified three chronic miasms: psora, sycosis and syphilis that he felt were the etheric imprints responsible for a range of disease phenomena. While he used allopathic terms such as infection, external morbid influences and the like, the Miasm concept can be more properly discussed within the context of wave form physics as generational imbalances created in past societal collectives.

### COLLECTIVE STRESS PATTERNING

- ▶ **PSORA - Immediate Survival:** Weather, animals, accidents, injuries, war, acute disease & scarcity issues. Skin afflictions figure prominently in psora as it represents our interface with the external world.  
Energetics - Earth Element: Imminent danger, lack & scarcity.
- ▶ **SYCOSIS - Growth & Reproduction:** Overproduction, discharges, heart & sexual disease with a tendency to excess ie. warts, growths, tumors, urogenital issues.  
Energetics – Water Element: Birth, growth, abundance & proliferation.
- ▶ **SYPHILITIC – Death & Destruction:** Decay, breakdown, contraction, panic attacks, fear of losing control.  
Energetics – Fire Element: Ego death, fear of the shadow side, winter/dark.
- ▶ **TUBERCULOSIS - Transformation:** Upper respiratory & throat constriction, homesickness, dissatisfaction, resistance to the encroachment of personal freedom, feeling displaced.  
Energetics – Air Element: Self-expression, romance vs sexual, restriction vs freedom, reconnection with Divine.
- ▶ **CANCER – Self in Relation to Others:** Cancerous growths, slow wound healing, suppression & conformity, going against your own sense of what is right for you.  
Energetics - Moon Element: individuation, moving toward compassion, love, empathy & individual self-identity, creating boundaries, self-assertion, taking responsibility.

# E-Motion vs Emotion

## Our Internal Weather

14

Enneagram: Character Fixations explain behavioral inclinations in play throughout a given embodiment as understood thru the Sufi model of Universal Creation, Vortex Mathematics & Russellian Science.

- ▶ Singularity/Stillness
- ▶ The Triangle: (9) Fulcrum (3. 6) Electric Polarization
- ▶ The Hexagon: The Pressure Points of the Creative Spiral
- ▶ Character Fixation: The Greatest Pressure Point Seeking Balance

Stress Patterning: Resistance to life's events relative to inherent inclinations.

### CONFLICT ENERGY

- ▶ Stress Pattern = Personal filters suppressing unencumbered experience.
- ▶ Early programming = External belief systems compounding conflicts.
- ▶ Conflict Energy = Emotional backpressure created by the stress pattern.

### TRAUMAS

- ▶ Traumas release conflict energy (emotional backpressure) of stress pattern.
- ▶ Traumas occur at regular intervals.
- ▶ Traumas → Toxic radiation → Energy/Organ depletion.

# E-Motion vs Emotion

## Our Internal Weather

15

Special Biological Programs: Human Biology as a vehicle for rapid Soul expansion.

- ▶ Animal Instincts → Embryologically Programmed.
- ▶ Survival Trigger → Human-Social Analogs
- ▶ Sudden Intense Trigger → Conflict Back-Pressure → Brain Area Stimulated (CAT).
- ▶ Brain-Body Correspondence → Holographic Tissue Response → Conflict Release

### THE BIOLOGICAL PLATEAU

- ▶ Tissue Changes = Disease = Diagnosis Conflict
- ▶ Repeated Trigger → Hanging Conflict
- ▶ Biological Resource Depletion → Biological Plateau.
- ▶ Biological Expression Bi-Phasic Completion → Tissue Normalization.
- ▶ Biological Assist = Reactionary Instincts → Conscious Rationality

### BIOTERRAIN REQUIREMENTS

- ▶ Inorganic & Organic Elements
- ▶ Tissue/Phase-Specific Microorganisms
- ▶ Drainage Protocols
- ▶ Mind-Body Awareness
